Technical bulletin

Prinergy Acrobat Plug-Ins for Acrobat 7

## What's new about the Acrobat 7 version of the Plug-ins?

- In Acrobat 7, the menu location to access the Creo plug-ins is now Adavnced→CreoTools instead of Tools→CreoTools. The toolbar of icons can still be found under View→Toolbars→CreoTools.

- Plug-in names have changed
  - The new plug-ins will only work in Acrobat version 7 whereas older versions were backwards compatible. So to distinguish them, the new plug-ins will have a "7" in their filenames. For example, "CreoToolsPro7.api" is the name of the Trapper/Dotshop/Separation viewer plug-in and will only work in Acrobat 7. "CreoToolsPro.api"will work in Acrobat 6 and lower.
  - The Mac OSX versions will have filenames that have the extension ".acroplugin" while Windows versions will have the extension ".api". Previously, Mac plug-ins had no extension.

- The appearance of tables in the Mac OSX versions of the PDF Trapper and Dotshop has changed. These changes were unavoidable due to the plug-in architecture changes in Acrobat 7. To rebuild the tables to look the same would have resulted in longer delays in shipping the plug-ins.
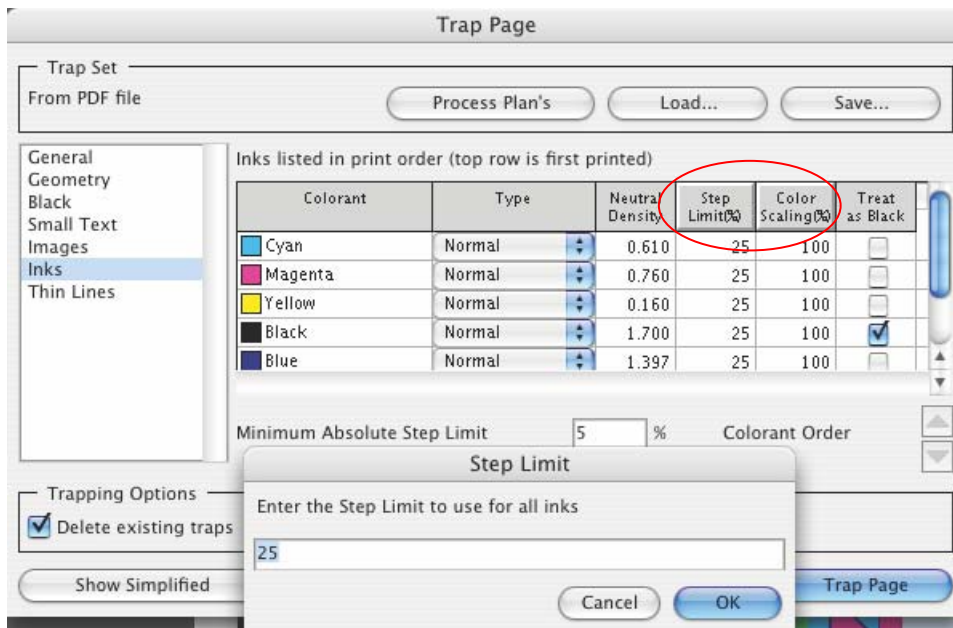

PDF Trapper Properties editor in Acrobat 7

PDF Trapper Properties editor in Acrobat 6

PDF Trapper Inks table in Acrobat 7. The individual columns can be resized, but the column titles had to be abbreviated. Also, the buttons that allowed the Step limit and Trap Color Scaling to all be set to the same value had to be removed. (See Acrobat 6 screen shot below)

PDF Trapper inks table in Acrobat 6 showing the control to set the Step Limit of all inks to the same value.

Where do the plug-ins get installed? (Mac OSX)

- In <volume>/Applications/Adobe Acrobat 7.0 Professional/, choose Acrobat 7.0 Professional and press <cmd> plus I, or from the File menu, select Get Info.

- The Acrobat 7.0 Professional Info dialog box appears.

- Click Plug-ins.

- A list of installed plug-ins appears.

- Click Add.

- Unstuff the plugins from the file "Acro7Plugins_Mac.hqx". Browse to the location where you unstuffed the plugins and choose all plug-ins.

- Click Choose.

- Close the Acrobat 7.0 Professional Info dialog box.

- Reopen the Acrobat 7.0 Professional Info dialog box

- Click Plug-ins to verify that the Prinergy plug-ins were installed and are listed.

Where do the plug-ins get installed? (Windows)

- Unzip the plugins from the file "Acro7Plugins_PC.zip".

- Copy the plugins to <drive>\Program Files\Adobe\Acrobat 7.0\Acrobat\Plug_ins\Prinergy.
  Where: <drive> is the disk drive that Adobe Acrobat is installed on (typically c:\).

About Creo

Creo is a world leader in solutions for the graphic arts industry. Core product lines include image capture systems; inkjet proofers; thermal imaging devices for films, plates, and proofs; professional color and copydot scanning systems; workflow management software; and proofing and printing consumables. Creo is also an original equipment manufacture supplier of on-press imaging technology, components for digital presses, and color servers for high-speed, print-on-demand digital printers. Creo trades under the symbols CREO on NASDAQ and CRE on the Toronto Stock Exchange. www.creo.com
